

DRAFT FOR REVIEW

News Release #6 – Saturday Morning Update

For release at 9:45 a.m.

November 30, 2019

Beaumont, Texas – Response measures are ongoing and Unified Command remains focused on mitigating the event and maintaining the safety of responders and the community.

The fire at TPC's Port Neches Operations is contained and significantly reduced. Unified Command is thankful for the continued support of emergency responders and community as this event is mitigated.

Federal, state, and local agencies have been conducting stationary and roaming air monitoring and will continue to do so through the course of the event. We are remaining diligent in our efforts to monitor air quality around the facility and downwind community. Air monitoring results, including any elevated readings, are being communicated to local authorities.

Out of an abundance of caution, TPC Group has offered to test property surfaces for the presence of asbestos. Property owners may call 1-866-601-5880 to request testing. This is also the helpline established for impacted residents to file insurance claims.

Unified Command remains focused on protecting the safety of responders and the public and minimizing any impact to the environment.
